Dear Hiring Manager,

I am writing to express my interest in the part-time Apple App Developer position at Datrose, Inc., as advertised. With my experience in Swift, previous work at Apple, and my current studies in software engineering at the Rochester Institute of Technology, I am excited about the opportunity to contribute to the RxASL within Deaf Hub. My proximity to the campus and flexible schedule further aligns with the requirements of this role.

During my time as a product specialist at Apple, I gained a deep understanding of the company's Human Interface Guidelines, an essential asset in developing user-friendly and intuitive applications. This role through on job training honed my skills in Swift and my ability to work collaboratively to meet consumer needs. Additionally, I have leveraged these skills in my personal projects, developing apps that prioritize efficient, scalable solutions and positive user experiences.

I am particularly drawn to this opportunity at Datrose because of its direct involvement with RIT, a community I am already a part of as a student. This connection not only makes the commute feasible but also enriches my enthusiasm to contribute to projects that could benefit my peers and the broader university community.

I am keen on utilizing my skills in Swift programming and my experience in app development to support the essential tasks outlined in the job description. From collecting user requirements and recommending design elements to conducting usability studies and assisting in research, I am prepared to engage fully with each aspect of the role. My organizational skills and programming knowledge equip me to support the team effectively, ensuring project goals are met efficiently and innovatively.

Thank you for considering my application. I am eager to bring my technical skills and passion for app development to the team at Datrose, contributing to meaningful projects that enhance the user experience within the Deaf Hub at RIT. I look forward to the opportunity to discuss how my background, skills, and enthusiasms align with the needs of your team.

Sincerely,
Jakob Langtry
